4 mm Tip Universal
 Temperature Monitoring
 Quadripolar
 7 F

Product Highlights

- Bi-Directional tip deflection
- Thermocouple and Thermistor temperature monitoring capability
- Rotary dial designed for fine tip movements
- Extra lateral stability (XLS) incorporated at catheter tip
- Ergonomic handling

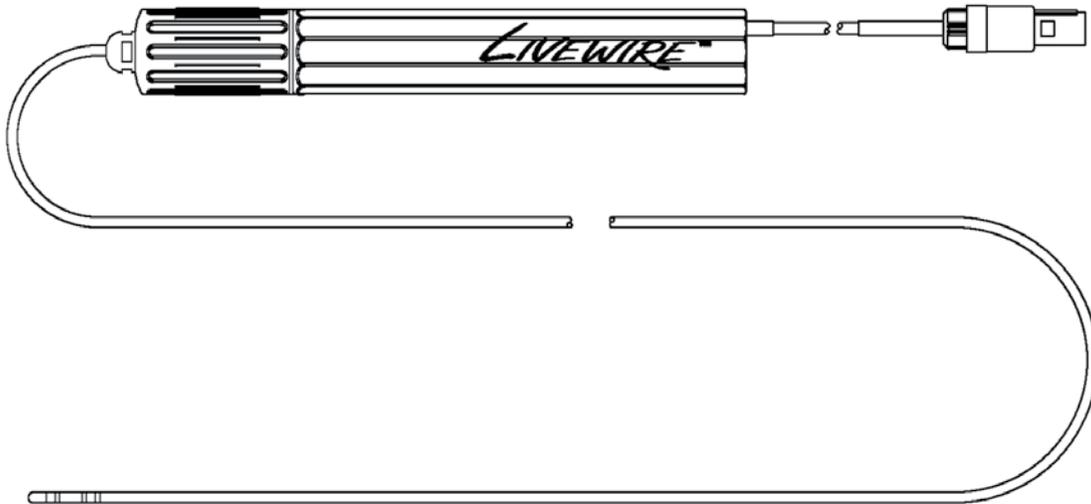

Ordering Information

7 F Quadripolar (XLS) catheter (1 unit per box)

REORDER NUMBER	ELECTRODE SPACING (MM)	TIP ELECTRODE (MM)	BAND ELECTRODE (MM)	DISTAL REACH	USABLE LENGTH (CM)

STANDARD ABLATION CATHETERS

Therapy™ Dual-8™ Ablation Catheters

8 mm Tip Dual Thermocouple
 Quadripolar
 7 F

Product Highlights

- Uni-directional steering
- 8 mm tip electrode with two thermocouples
- High power option up to 100 watts
- Push/pull handle

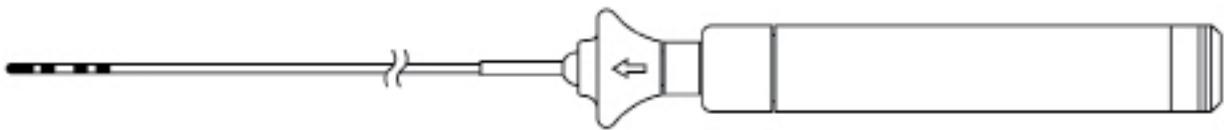

Ordering Information

FlexAbility™ Ablation Catheter Sensor Enabled™

Product Highlights

- Combines unique flexible tip with a handle and shaft designed to navigate the heart with accuracy and consistent performance*†
- D, F and J curve options
- Symmetric or asymmetric options
- Ergonomic uni- and bi-directional handles are designed for consistent performance and fatigue reducing enhancements**
- Integrates with EnSite Precision™ cardiac mapping system and MediGuide™ Technology

TactiCath™ Contact Force Ablation Catheter, Sensor Enabled™

Product Highlights

- Fully integrated with the EnSite Precision™ Cardiac Mapping System
- Offers a variety of curve sizes to accommodate size differences in patient anatomy
- Fast, easy setup and enhanced workflow is obtained through an intuitive display of contact force (CF) data
- CF parameters:
 - FTI™ – Force Time Integral parameter measured in real-time during catheter ablation procedures
 - LSI™ Index – Lesion Index combining CF, radio frequency (RF) application duration and RF current*
- Fiber-optic CF technology that provides accurate and reliable readings¹
- Requires TactiSys™ Quartz equipment and EnSite™ Contact Force Module software

Ordering Information

TactiCath™ Quartz Contact Force Ablation Catheters

Product Highlights

- Provides fast, real-time contact force (CF) measurement based on light interferometry technology
- Real-time feedback: Fast 50 Hz (20ms) sample rate streamlines workflow
- Fast, easy setup and enhanced workflow is obtained through an intuitive display of CF data
- CF parameters:
 - FTI™ Index – Force Time Integral parameter measured in real-time during catheter ablation procedures
 - The LSI™ (Lesion Index) is a proprietary index combining contact force, radiofrequency (RF) application duration, and RF current*
- Force sensor just proximal to ablation electrode to measure force as close to the catheter tip as possible
- Fiber optic technology for optimal sensitivity and stability during CF measurement**
- 75 or 65 mm steerable curve
- Requires TactiSys™ Quartz hardware and EnSite™ Contact Force Module software

Ordering Information

Open-irrigated 7 F ablation catheter with 75 or 65 mm steerable curve

Ampere™ RF Ablation Generator

Product Highlights

- Specifically designed to work alongside the EnSite™ Velocity™ Cardiac Mapping System
- Designed for compatibility with EP-WorkMate™ Recording System, WorkMate Claris™ Recording System, EnSite Precision™ cardiac mapping system, MediGuide™ technology and other major recording systems
- Choice of power or temperature control modes
- Large, colorful screen and buttons for easy reading and programming
- New programming options, including automatic irrigation flow adjustment and variable power ramp-up times
- Up to four presets for easy switching between settings
- Optional full-color screen remote control and footswitch available

Ordering Information

REORDER NUMBER	DESCRIPTION
H700494	Ampere™ RF Generator Kit (includes generator + footswitch, 2.5 m cable, accessories)
H700490	Ampere™ RF Generator Remote Control (includes 15 m fiber cord)
H700498	Ampere™ RF Generator Footswitch, 2.5 m
H700499	Ampere™ RF Generator Footswitch, 5 m
H700500	Ampere™ RF Generator Footswitch, 10 m
H700501	Ampere™ RF Generator Footswitch, 15 m
H700504	Ampere™ Generator Accessories (kit includes U.S. power cord [IEC320], equipotential cable, 4-lead EGM cable, serial mouse DB9 data assembly cable, and cable/conn ablation assembly – amplifier)

Ampere™ RF Ablation Generator

Ampere™ Remote Control

Cool Point™ Irrigation Pump

Product Highlights

- Peristaltic pump
- Two-way communication with the compatible cardiac ablation generator
- Two microliter bubble detectors
- In-line pressure sensor to detect downstream occlusion
- Compact, lightweight design
- Ergonomic carrying handle
- Includes: Irrigation Pump, Power Cord, Tubing Set, Pole Clamp, 1779 Connecting Cable, Operator's Manual

Ordering Information

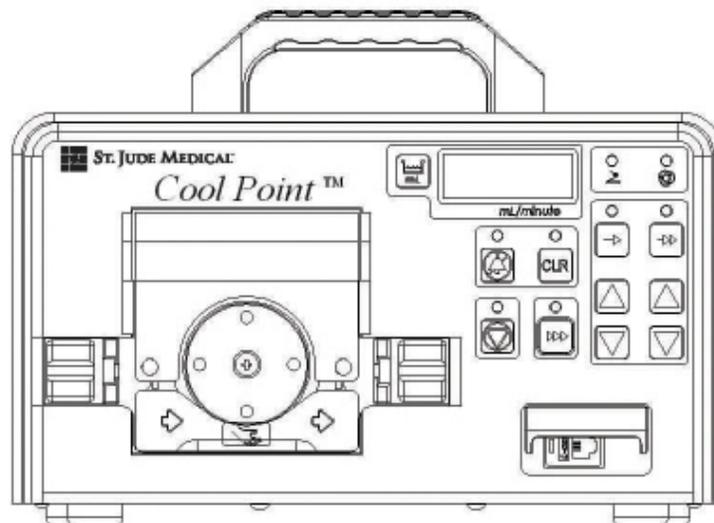

REORDER NUMBER	DESCRIPTION
IBI-89003	Cool Point™ Irrigation Pump

Required Cool Point Tubing Set

REORDER NUMBER	DESCRIPTION	LENGTH (CM)
85785	Cool Point™ Tubing Set (sold individually)	260

Required Cool Point Accessories

REORDER NUMBER	DESCRIPTION	LENGTH (CM)
IBI-85786	Communications cable, 20-feet, between Cool Point™ Irrigation Pump and compatible cardiac ablation generator	609

TactiSys™ Quartz Equipment

Product Highlights

- Fast sampling rate for accurate Contact Force information
- No lengthy startup calibration procedure required
- Proprietary indicators designed to assess lesion formation, including:
 - FTI™ Index – Metric that combines contact force and the duration of ablation
 - LSI™ Index – A proprietary index combining contact force, radiofrequency (RF) application duration and RF current*

Ordering Information

REORDER NUMBER	DESCRIPTION	LENGTH (M)
PN-004 400	TactiSys™ Quartz	
PN-004 511	TactiSys™ Quartz Mount	
PN-004 514	TactiSys™ Quartz Stockert RF Cable	
PN-004 515	TactiSys™ Quartz Ampere RF Cable	
PN-004 516	TactiSys™ Quartz Ethernet	10

*This parameter was displayed during ablation procedures in a 31-patient supplemental study to the TOCCASTAR clinical trial. However, the clinical utility of this parameter has not been evaluated.

Technical Service and Support Abbott Extended Service Plan

Product Highlights

- Maximize your investment with extended coverage on hardware
- Easy access to Technical Telephone Support within 15 minutes so equipment issue can be addressed efficiently
- Quickly receive next day shipment of replacement unit*
- If needed, loaner equivalent is available to minimize downtime

*Next business day delivery dependent on time of part order request and location; remote areas may experience longer delivery times.

Description

Extended Service Plan provides comprehensive and extended service coverage beyond the initial 12-month warranty for Abbott’s capital equipment. Staying current with this program will help ensure that you maximize your capital equipment investment throughout the life of each product.

We provide you with the option to select coverage for specific pieces of equipment or design a comprehensive plan that covers all your Abbott capital equipment. Plans are available in one-, two, or three-year terms.

Ordering Information

Coverage Plans Available

Each piece of capital equipment can count toward any multi-system discounts when creating a master service agreement for all of your St. Jude Medical capital equipment service needs.

Extended service plans are offered on the following capital equipment.

Fast-Cath™ Hemostasis Introducers

12 cm Sheath
4 F – 9 F

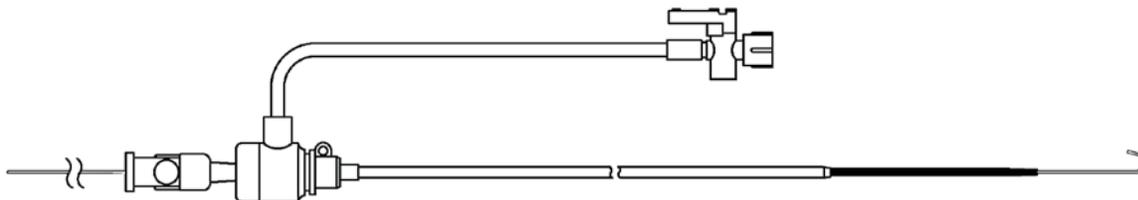

Product Highlights

- Close tolerance extrusion and proprietary tipping process facilitate tracking on a guidewire
- Convenient suture rings to secure sheath during catheter manipulation or during prolonged vascular access
- Valve preserves catheter handling characteristics while minimizing backbleeding and air aspiration
- Snap lock feature secures dilator in sheath during insertion

Ordering Information

Introducer Sheath with Hemostasis Valve and Sideport, Dilator, and 150 cm Double Distal Guidewire with “J” and straight ends (10 units per box)

Fast-Cath™ Duo Hemostasis Introducers Cath-Lock™ Locking Hub

12 cm Sheath
8 F – 12 F

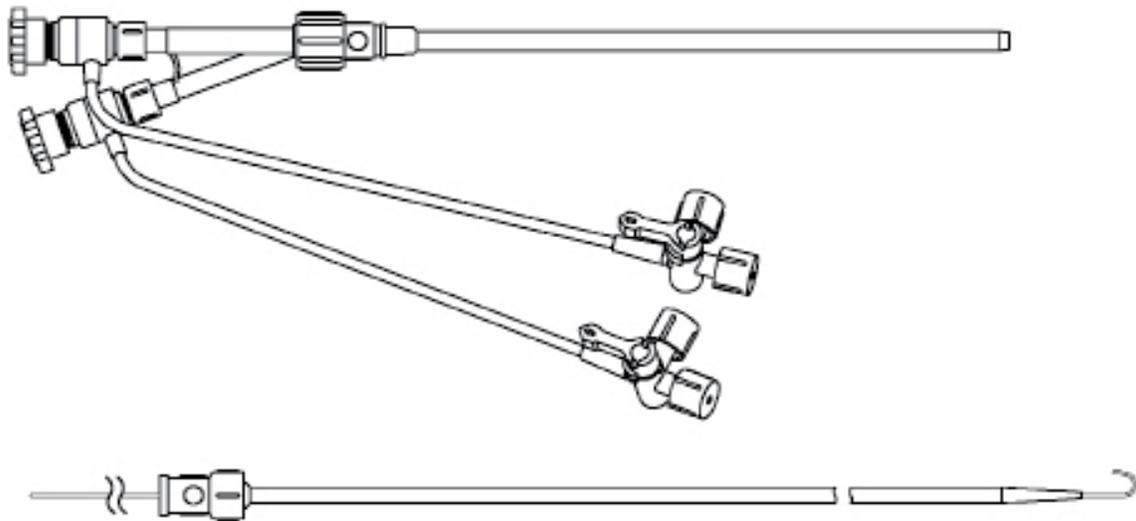

Product Highlights

- All of the advantages of Fast-Cath™ hemostasis introducer technology
- Two catheter access reduces the need for multiple punctures
- Multiple sideports to flush and aspirate prior to catheter insertion
- Color coded Cath-Lock™ caps simplify catheter site identification
- Luer lock feature secures dilator in sheath during insertion
- Cath-Lock™ locking hub secures indwelling catheters in position

Agilis™ NxT Steerable Introducer

40 cm

Response™ CRD Electrophysiology Catheter

17 Gauge, 11.4 cm needle
8.5 F

Product Highlights

Agilis™ NxT Steerable Introducer:

- Precise steering control
- Ergonomic handle
- Dual-Reach™ bi-directional deflection
- Braided introducer shaft
- Atraumatic tip
- Integrated hemostasis valve
- Radiopaque tip marker

Response™ Electrophysiology Catheter:

- Torque control and pushability
- Convenient cable alleviates tedious connections

Needle:

- Tuohy-curve at tip
- Wings to facilitate ease of use
- Stylet - removable with Hub
- Centimeter length markings on needle shaft
- Luer-lock fitting

Agilis™ NxT Steerable Introducers Dual-Reach™

71 cm Sheath
8.5 F

Product Highlights

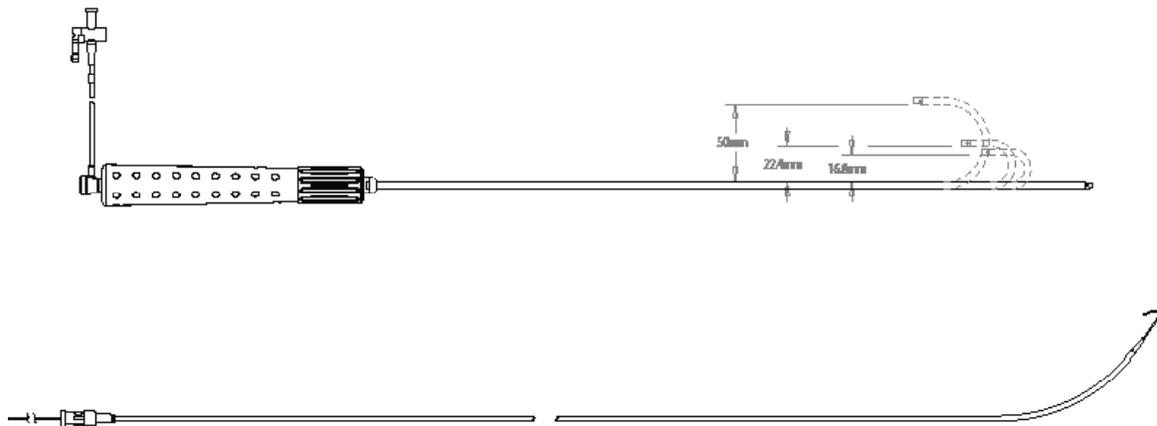

- Precise steering control
- Ergonomic handle
- Dual-Reach™ bi-directional deflection
- Braided introducer shaft
- Select models with improved kink resistance
- Atraumatic tip
- Integrated hemostasis valve
- Radiopaque tip marker
- Accommodates 98 cm length BRK™ Transseptal Needles, BRK-1™ and XS series versions, see pages B.37 and B.38

Ordering Information

8.5 F Agilis™ NxT Steerable Introducer w/Tip Marker; 91 cm Lumen Length, 71 cm Usable Length, Dilator and 180 cm Super Stiff Guidewire with Finger Straightenable 3 mm “J” (1 unit per box)

Swartz™ Braided Transseptal Guiding Introducers SL™ Series

63 cm Length
8 F – 8.5 F

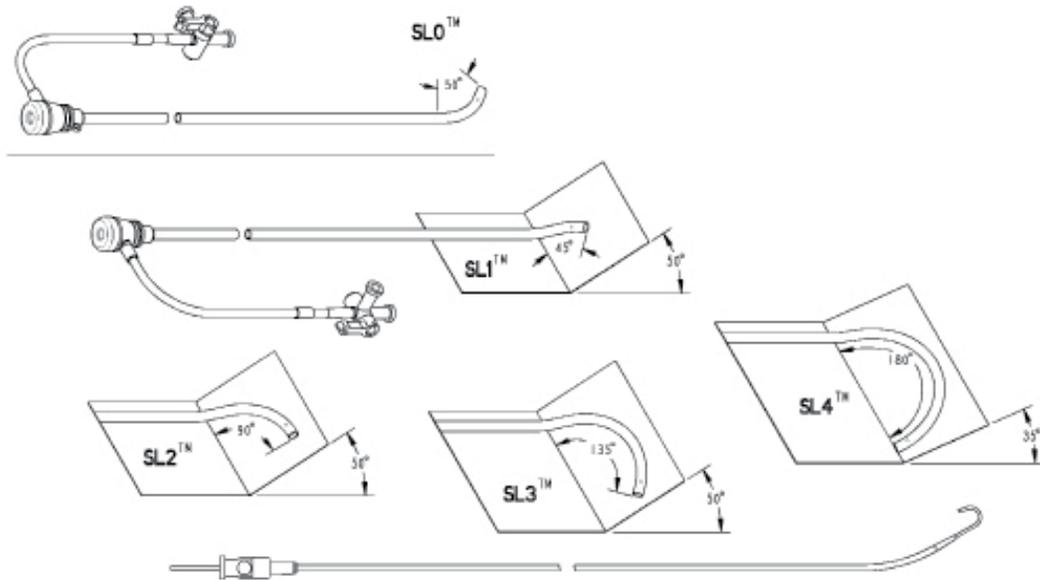

Product Highlights

- Braided sheath facilitates torqueability, pushability and catheter stability
- Ultra-soft tip for atraumatic performance
- Multiple curve options available
- Smaller offset sideholes reduce likelihood of guidewire exiting sidehole
- Ultim™ valve for effective hemostasis and minimal risk of air aspiration
- Accommodates 71 cm length BRK™ Transseptal Needles, BRK-1™ and XS series versions, see pages B.37 and B.38

Swartz™ Braided Transseptal Guiding Introducers LAMP™ Series

63 cm Length
8 F – 8.5 F

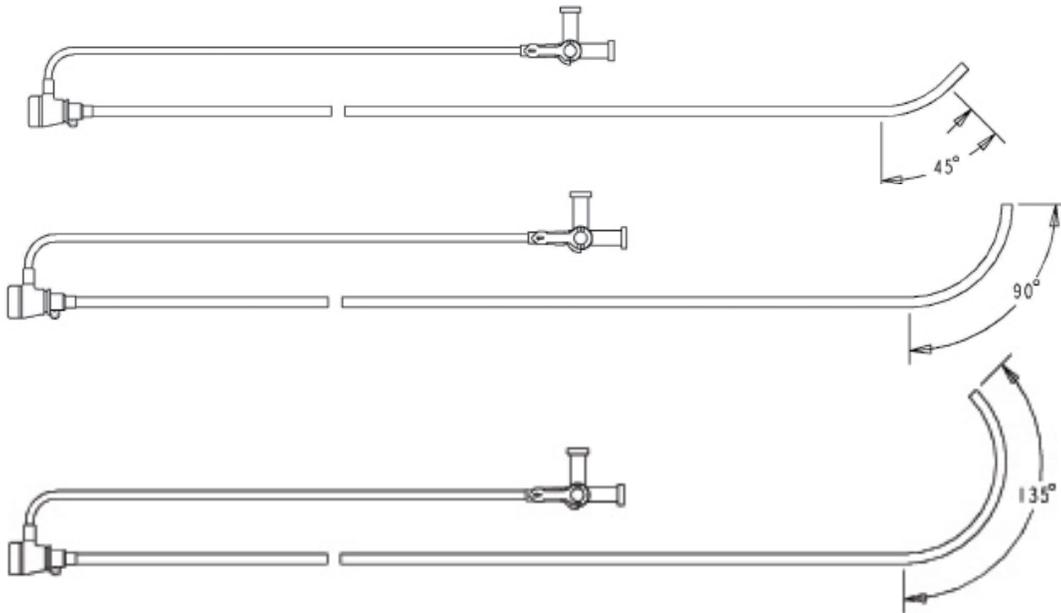

Product Highlights

- Braided sheath facilitates torquability, pushability and catheter stability
- Ultra-soft tip for atraumatic performance
- Three curve options available (LAMP™ 45, LAMP™ 90, LAMP™ 135) (LAMP = Left Atrial Multi Purpose)
- Smaller offset sideholes reduce likelihood of guidewire exiting sidehole
- Ultimum™ valve for effective hemostasis and minimal risk of air aspiration
- Accommodates 71 cm length BRK™ Transseptal Needles, BRK-1™ and XS series versions, see pages B.37 and B.38

Fast-Cath™ Transseptal Guiding Introducers

61 cm Sheath
6 F – 8.5 F

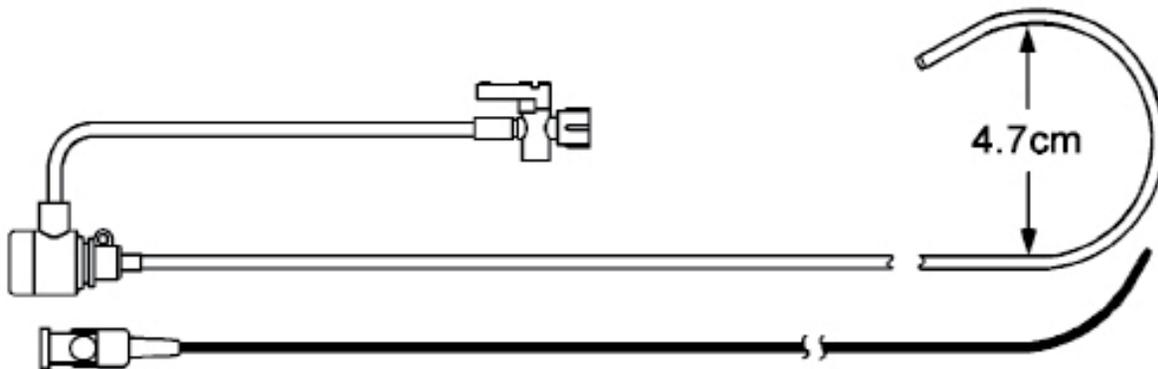

Product Highlights

- Close tolerance extrusion and proprietary tipping process facilitate tracking on a guidewire
- Convenient suture rings to secure sheath during catheter manipulation or during prolonged vascular access
- Fast-Cath™ valve preserves catheter handling characteristics while minimizing backbleeding and air aspiration
- Snap lock feature secures dilator in sheath during insertion
- Centimeter markings on the proximal portion of the dilator
- Accommodates 71 cm length BRK™ Transseptal Needles, BRK-1™ and XS series versions, see pages B.37 and B.38

Advisor™ FL Circular Mapping Catheters

Sensor Enabled™
8 F

Product Highlights

- Torque response and planarity for catheter control
- Consistent 180 degree deflection for ease of loop placement
- Two additional shaft electrodes to aid catheter visualization
- Bi-directional handle with asymmetric D/F curve
- Push/pull handle with uni-directional D curve
- 2 mm tip and 1 mm band electrodes
- 4 F loop on 7.5 F shaft compatible with 8 F introducer
- Integrates with EnSite Precision™ cardiac mapping system and MediGuide™ technology

Advisor™ VL Circular Mapping Catheters

Sensor Enabled™
8 F

Product Highlights

- Bi-directional handle with asymmetric D/F curve
- Torque response and planarity for catheter control¹
- Consistent 180 degree deflection for ease of loop placement
- Two additional shaft electrodes to aid catheter visualization
- Push/pull handle with uni-directional D curve
- Inactive tip and 1 mm band electrodes
- 4 F loop on 7.5 F shaft compatible with 8 F introducer
- Integrates with EnSite Precision™ cardiac mapping system

INTRACARDIAC IMAGING

Intracardiac Echocardiography (ICE)

ViewMate™ Ultrasound Console E.3
ViewFlex™ Xtra ICE Catheters E.4

ViewMate™

Ultrasound Console

Description

The ViewMate™ Ultrasound Console is a fully featured, compact console that quickly delivers high fidelity imaging to assist clinicians performing complex electrophysiology and interventional procedures. When the console is paired with a ViewFlex™ Xtra ICE Catheter, clinicians may visualize cardiac structures, blood flow and other devices within the heart.

Product Highlights

- Fully connectable with DICOM and network capabilities
- Multiple imaging modes, including 2-D, M-Mode, Pulsed Wave, Color Doppler and others
- Software-based architecture for rapid image optimization
- Enhanced far-field resolution enables assessment of distal devices and structures
- Multi-Transducer Port (MTP) – up to three transducers connected simultaneously
- Easy-to-move console with small footprint
- Rapid bootup time enables quick start to imaging

ViewFlex™ Xtra

ICE Catheter

Description

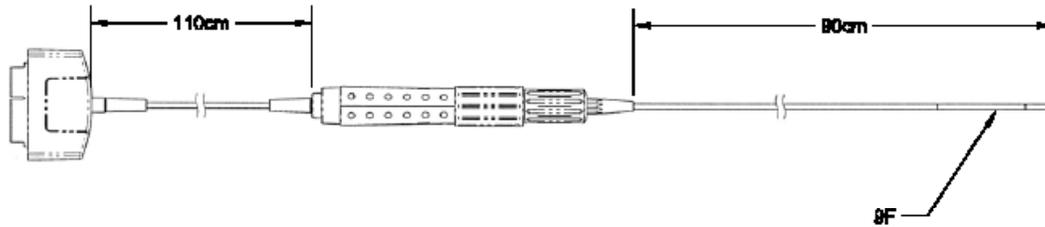

The ViewFlex™ Xtra ICE Catheter is a temporary intracardiac ultrasound catheter indicated for use in adult and adolescent pediatric patients to visualize cardiac structures, blood flow and other devices within the heart when connected to ViewMate™ ultrasound console via the ViewFlex™ Catheter Interface Module.

Product Highlights

- Single-handed, self-locking steering
- 9 F catheter size
- 10 F introducer
- 90 cm insertable length
- Four-way tip deflection, anterior/posterior, left/right
- 120 degree tip deflection
- 64 element phased array

EnSite Precision™

Cardiac Mapping System

Description

The EnSite Precision™ Cardiac Mapping System is a catheter navigation and mapping system capable of displaying the three-dimensional (3-D) position of conventional and sensor-enabled electrophysiology catheters, as well as displaying cardiac electrical activity as waveform traces and as dynamic 3-D isopotential maps of the cardiac chamber. The contoured surfaces of these 3-D maps are based on the anatomy of the patient’s own cardiac chamber. Various software expansion modules and warranties are available.

Product Highlights

- Features an open platform that is compatible with almost any EP catheter and most EP lab equipment
- EnSite™ Contact Force Module with the AutoMark feature allows for enhanced visualization and evaluation in real-time, or review and displays the contact force of compatible ablation catheters
- The EnSite™ AutoMap Module automates the point collection process, based on the user-defined settings. As the catheter is moved, points are collected when the user-defined settings are met
- Impedance-field flexibility plus magnetic-field stability

Ordering Information

The EnSite Precision™ System is comprised of three groups of components; the EnSite™ Amplifier, the display workstation and the EnSite Precision™ Module. The system includes the EnSite™ Courier™ PACs Module v3.0, EnSite™ Derexi™ Module v.1.3.1, EnSite™ Verismo™ Module v.2.0.1 and EnSite™ Fusion™ Module v.7.1. Disposable components and expansion modules commonly used with the system are listed below.

H702533	EnSite Precision™ Adjustable Field Frame Bracket

Expansion Modules for Legacy EnSite™ Velocity™

Cardiac Mapping System

Description

The EnSite™ Velocity™ Cardiac Mapping System is a non-fluoroscopic mapping and catheter navigation system. The System creates three-dimensional (3-D) models that are based on the anatomy of the patient’s own cardiac chamber. Cardiac electrical activity can be displayed as waveform traces or as dynamic activation or voltage maps which are superimposed on the 3-D models. The navigation system displays the real time position of conventional electrophysiology catheters in relation to the 3-D model. The EnSite™ Velocity™ System has been designed for ease-of-use and to enhance procedural lab efficiencies. Various software expansion modules and warranties are available.

Product Highlights

- Facilitates procedures in all chambers of the heart
- Features an open platform that is compatible with almost any EP catheter and most EP lab equipment
- Provides real-time visualization and navigation of up to 128 electrodes on virtually any combination of catheters
- The OneModel Tool enables users to create a precise model of patient cardiac anatomy in less time than previously possible
- OneMap Tool, in conjunction with the OneModel Tool, allows for the simultaneous creation of the desired cardiac model and electrical map in the fewest cardiac cycles
- Supports both contact and non-contact mapping procedures.
- Detailed model creation and a full suite of mapping tools help facilitate all popular treatment strategies

Ordering Information

The EnSite™ Velocity™ System is comprised of two groups of components, the EnSite™ Amplifier, and the display workstation. Disposable components and expansion modules commonly used with the system are listed below.

REORDER NUMBER	DESCRIPTION
H702495	EnSite™ Velocity™ Software v.5.0.1 (upgrade from EnSite™ Velocity™ Software v 4.x)

VantageView™ System

Description

The VantageView™ System is a state-of-the-art high definition (HD) monitor that improves the clarity and definition of critical case information in the EP lab. By consolidating video images from multiple technologies into one centralized location, the VantageView™ System can simultaneously display real-time information from cardiac mapping systems, recording systems and ultrasound systems amongst others. The VantageView™ System also includes a convenient touch-panel interface to easily create or modify pre-set views based on user preferences.

Product Highlights

- 3840 x 2160 pixel resolution
- Maintains native aspect ratio of all inputs for optimal image definition
- Digitizes all inputs for highest image clarity and color resolution
- Easy to use Touch Panel allows customization of up to 49 pre-sets
- Video Processing Rack minimizes excess noise
- Patch Point Connection Boxes consolidate cabling to minimize clutter near the monitor
- One-year initial warranty

Ordering Information

58" Quad HD monitor on stand,* two Touch Panels (one mounted bedside, one remote), Video Processing Rack, associated fiber optic hardware and cables for 16 video inputs.

Abbott's Assurance™ Plus Service and Technology Programs

Description

The Assurance™ Plus Service and Technology Program provides comprehensive and extended service coverage beyond the initial 12-month warranty for Abbott's capital equipment. Staying current with this program will help ensure that you maximize your capital equipment investment throughout the life of each product.

We provide you with the option to select coverage for specific pieces of equipment or design a comprehensive plan that covers all your Abbott capital equipment. Plans are available in one-, two- or three-year terms.

Product Highlights

- Software revisions and software upgrades are included as part of your Assurance Plus Service and Technology Program. Any software release defined as a new software expansion module is not included and must be purchased separately.
- Response for customers with Abbott's capital equipment covered under this program are as follows:
 - Telephone response from Abbott's Technical Support
 - If required, overnight shipment of replacement parts
 - If needed, a site visit by an Abbott Service Technician
- Service level varies by program tier and geography. Response time is not guaranteed for capital equipment not covered under this program

WorkMate Claris™ System

Description

The WorkMate Claris™ System is a highly sophisticated, yet simple to use workstation that provides electrogram acquisition while serving as the technology platform for the seamless integration with other systems and products used in the EP lab.

Product Highlights

- ClearWave™ Signal Acquisition Technology provides 32-bit digital electrogram acquisition
- The WorkMate Claris™ System puts everything you need to complete your study right at your fingertips. Hot keys are built into all features of the WorkMate Claris™ System, making it even easier to use the features you need
- The EP-4™ Cardiac Stimulator can be used in a standalone capacity or as a fully integrated component of the WorkMate Claris™ System, providing integrated annotations and the ability to output up to four pacing channels. Fully programmable protocols and accommodations for multiple users create a custom stimulation interface for each specific operator
- Ablation window displays real-time measurements in both graph and numerical form for supported radiofrequency and cryoablation generators
- The WorkMate Claris™ System features real-time analysis intervals that include R-R, A-A, V-V, V-A, stimulation, and pressures waveforms
- Connectivity with existing IT systems is easy, powerful and cost-effective. The WorkMate Claris™ System uses existing IT infrastructure to minimize the complexities and costs associated with a network solution

Ordering Information

WorkMate Claris™ Systems include: Advanced Electrophysiology Signal Processing Computer, Signal Conditioning Unit with ClearWave Signal Acquisition Technology, Integrated 4-Channel EP-4 Stimulator, High-Resolution LCD Monitors (Real Time, Review/Control, and Slave), Laser Printer, Primary and Bedside Carts, All Associated Cables.

REORDER NUMBER	DESCRIPTION

H700169	WorkMate Claris™ System 56 channel system w/ EP-4 Stimulator

EP-4™ Cardiac Stimulator

Description

The EP-4™ Cardiac Stimulator features high-speed processing capabilities, an intuitive user interface and an array of time saving key-command shortcuts.

Product Highlights

- The EP-4 Cardiac Stimulator functions as an integrated component with the WorkMate Claris™ System or EP-WorkMate™ Recording System, or as a stand-alone stimulation system
- With six separate users each having nine standard and 10 user-definable protocols, the EP-4™ Stimulator provides maximum versatility
- Operators can control the stimulation protocol through a touchscreen, keyboard, mouse or the WorkMate Claris™ or EP-WorkMate™ Recording System
- Direct AC power reduces the risk of a battery failure during operation

Ordering Information

Contents: EP-4™ Cardiac Stimulators include: EP-4™ Cardiac Stimulator, Touch Screen Stimulator Control, All Associated Cables

REORDER NUMBER	DESCRIPTION
EP-4-04-110	EP-4™ Cardiac Stimulator - 4 Channel (110V) Includes Touch Screen Control
EP-4-04-220	EP-4™ Cardiac Stimulator - 4 Channel (220V) Includes Touch Screen Control

WorkMate™ Scribe™ Module

Description

The WorkMate™ Scribe™ Module is an integrated real-time review station for the WorkMate Claris™ System that allows a separate user to review and edit patient study data stored on the WorkMate Claris™ System and document patient care data during an electrophysiology (EP) study.

Product Highlights

- Electronic monitoring for easy charting and monitoring of patient vital signs and procedure parameters remotely
- Ablation window for review of radiofrequency and cryoablation data
- Charting window specific for patient care documentation
- Review and real-time electrograms
- Procedure log synced with the WorkMate Claris™ System
- Patient monitoring via the physiologic monitoring device
- Patient physiological data window
- Medications window to document medications given
- Single patient record for EP case

WorkMate™ Unity™ Module

Description

WorkMate™ Unity™ Modules enable the WorkMate Claris™ System to connect and communicate with IT resources within the hospital.

Product Highlights

- WorkMate™ Unity™ HL-7 Module: Query hospital information systems using HL-7 interface for patient demographic data to eliminate manual data entry time and reduce the potential for errors. At the end of the study, transmit HL-7 encoded reports to the electronic medical records or any HL-7 compliant system.
- WorkMate™ Unity™ DICOM Module: Store and retrieve procedure data onto a PACS to reduce time spent saving cases onto external media, such as DVDs, and archiving the external media in accordance with hospital policies.
- WorkMate™ Unity™ Review Module: Review archived patient data online, eliminating storage space constraints and disk integrity concerns, and allowing sensitive data to be secured within the hospital IT environment.
- Contact your Abbott representative for hardware requirements.

WorkMate™ ImageSync™ Advanced Image Acquisition Module

Description

This WorkMate Claris™ System upgrade option allows connections to advanced imaging modalities. This imaging connection enables the creation of color images or loops which are correlated to the patient data acquired with the WorkMate Claris™ System.

Product Highlights

- Easily access clinical images during a procedure, such as from the EnSite™ Velocity™ Cardiac Mapping System or the ViewMate™ Intracardiac Ultrasound System.
- Correlate image data with recorded electrograms.
- Visualize catheter locations in relation to the associated electrograms.
- Easily review cases on one system only — no need to turn on other systems to retrieve critical images.
- Create comprehensive slides detailing multiple aspects of an EP procedure occurring concurrently.
- Access up to two additional color video inputs (VGA or DVI); the WorkMate Claris™ System offers standard imaging capability and includes two composite black-and-white image inputs.

Ordering Information

WorkMate™ ImageSync™ Module includes: Image inputs for two additional sources. Sources may be VGA or DVI.

REORDER NUMBER	DESCRIPTION
H700116	WorkMate™ ImageSync™ Module

EnSite™ Derexi™ Module

Description

The EnSite™ Derexi™ Module is designed to provide seamless communication between the EnSite™ Velocity™ Cardiac Mapping System and WorkMate Claris™ System or EP-WorkMate™ Recording System to improve lab efficiency and manage case information.

Product Highlights

- Automated transfer of patient demographics into EnSite™ Velocity™ System from WorkMate Claris™ or EP-WorkMate™ Recording System.
- Data synchronization between EnSite™ Velocity™ System and WorkMate Claris™ or EP-WorkMate™ Recording System — maps, mapping points and recorded segments of data.
- Comprehensive case reports — EnSite™ Velocity™ System snapshot images are included in the WorkMate Claris™ System case report.
- Review of patient data from either system—updates both EnSite™ Velocity™ System and WorkMate Claris™ or EP-WorkMate™ Recording System
- System to appropriate time segments for comprehensive clinical review.

Ordering Information

Software Installation CD, EnSite™ Derexi™ Software Entitlements, Ethernet Cable, Ethernet Isolator, Instructions for Use.

Pre-requisites for the EnSite™ Derexi™ Module Kit include: EnSite™ Velocity™ System with v.1.2 software or higher, WorkMate Claris™ System or EP-WorkMate™ Recording System with v.4.2 software or higher.

EP-4™

Cardiac Stimulator
(Legacy Systems)

Description

The EP-4™ Computerized Cardiac Stimulator features high-speed processing capabilities, an intuitive user interface and an array of time saving key-command shortcuts.

Product Highlights

- The EP-4™ Cardiac Stimulator functions as an integrated component with the EP-WorkMate™ Recording System, or as a stand-alone stimulation system.
- With six separate users each having nine standard protocols and 10 user-definable protocols, the EP-4™ Cardiac Stimulator provides maximum versatility.
- Control the stimulation protocol through a touch screen, keyboard, mouse or the EP-WorkMate™ Recording System.
- Direct AC power reduces the risk of a battery failure during operation.

Ordering Information

EP-4™ Cardiac Stimulators include: EP-4™ Cardiac Stimulator, Touch Screen Stimulator Control, All associated cables

MODEL NUMBER	DESCRIPTION
EP-4-04-110	EP-4™ Cardiac Stimulator - 4 Channel (110V) Includes Touch Screen Control
EP-4-04-220	EP-4™ Cardiac Stimulator - 4 Channel (220V) Includes Touch Screen Control

EP-4-04-110

EP-WorkNet™ EP-WorkMate™

Networking Products
(Legacy Systems)

Description

EP-WorkNet™ products enable the EP-WorkMate™ Recording System to connect and communicate with IT resources within the hospital.

Product Highlights

- EP-WorkNet™ Data Manager HL-7 Interface Software. This software suite, installed at the hospital site, allows for the exchange of data between the EP-WorkMate™ Recording System and any HL-7 compliant system.
- EP-WorkNet™ DICOM Interface for Patient Data Storage. This software enables the EP-WorkMate™ Recording System to store and retrieve EP-WorkMate™ study data.
- EP-WorkNet™ Review Client Software. EP-WorkMate™ studies stored on a network or PACs server may be reviewed on existing hardware utilizing this review client software.
- Contact your Abbott representative for hardware requirements

EP-WorkMate™ Recording System Upgrades

(Legacy Systems)

Description

Several upgrade options are available for the EP-WorkMate™ Recording System.

Product Highlights

- EP-WorkMate™ Recording System v.4 Platform Upgrade. This package upgrades an existing EP-WorkMate™ Recording System v.3 Platform to an EP-WorkMate™ Recording System v.4 Platform. This upgrade includes a new CPU and SCU. EP-WorkMate™ Recording System v.4 Platform does not support the EP-3 stimulator.
- Signal Conditioning Unit (SCU) Upgrade. Increase the number of channels on an existing 24 or 56 channel system to 120 intracardiac channels.
- Software Upgrade. Upgrade the current EP-WorkMate™ Recording System to the latest version of system software. Not applicable for platform upgrades.

Technical Service and Support Abbott's Assurance Service and Technical Program

Product Highlights

- The Assurance™ Plus Plan covers all service and repair related events and entitles customers to receive any system software upgrade released while the Assurance Plus Plan is active
- The Assurance Plan covers all service and repair related events
- Coverage can be extended on an annual basis

Description

The Assurance Service and Technical program for the EP-WorkMate™ Recording System provides customers with the option of extending their system warranty beyond the standard 12-month post-installation coverage. Two levels of extended coverage are available to best meet specific customer needs.

Confirm Rx™

Model DM3500
Insertable Cardiac Monitor

Description

The Abbott Confirm Rx™ ICM is designed to detect arrhythmias and wirelessly transmit data to the Merlin.net™ Patient Care Network for the following patients:

Patients who experience transient symptoms that may suggest a cardiac arrhythmia

Patients with clinical syndromes or situations at increased risk of cardiac arrhythmias

Patients who have been previously diagnosed with AF or who are susceptible to developing AF

Product Highlights

Device:

- Small size (~1.4 cc) with slim profile
- Simple insertion procedure requiring minimal time and resources
- Intuitive one-touch programming on the Merlin™ Patient Care System
- Patient activated and auto activated triggers for EGM storage
- Programmable data storage options to ensure capture of significant events while reducing the risk of missing unexpected events

- Proven Abbott SenseAbility™ feature designed to allow accurate sensing over a wide range of signals
- 1.5 T MR Conditional

Mobile App and Connectivity:

- Bluetooth® wireless technology between ICM and myMerlin™ app which patients can download onto their Android‡ mobile device. No need for a separate bedside transmitter or patient activator
- ICM continuously monitors rhythm and myMerlin app proactively transmits data per schedule and alerts set by the clinic
- App features integrated activator functionality, allowing patients to privately record and transmit EGMs during symptoms. No separate activator hardware required
- Notifications inform patients of daily device checks and scheduled transmissions to promote remote monitoring adherence without burdening the clinic
- Transmissions are sent to Merlin.net™ Patient Care Network providing clinicians with data and reports
- App available in 35+ languages to engage patients and provide a personalized experience
- Abbott mobile transmitters may be purchased for patients without their own compatible mobile device*
