

INSTRUCT™ PATIENT EDUCATION PATHWAY CARDIOMEMS™ HF SYSTEM

DIRECT-TO-PATIENT EDUCATION

- Convenient text message format
- Simple-to-understand video messages
- Designed for patients and caregivers
- Messages are stored to support repeat viewing

CARDIOMEMS™ HF SYSTEM POST-IMPLANT EDUCATION PATHWAY

DAY 0	Welcome Home	DAY 4	Get Connected With the myCardioMEMS™ App
DAY 0	Setting Up the CardioMEMS™ HF System in Your Home	DAY 5	CardioMEMS HF System ID Card and Imaging
DAY 1	Taking Your First Reading	DAY 6	Traveling With Your CardioMEMS HF System
DAY 1	First Reading Check-in and Troubleshooting	DAY 7	Speak to a CardioMEMS HF System Patient
DAY 2	Insertion Site Check Following Right Heart Catheterization	DAY 15	Caring for the CardioMEMS HF System
DAY 3	Partnering With Your Doctor to Manage Your Heart Failure		

1

Patient is implanted with the CardioMEMS™ PA Sensor

2

POST-IMPLANT enrollment instructions are provided to the patient/caregiver

3

Patient/caregiver enrolls, and education begins immediately

TO ENROLL A PATIENT AND/OR CAREGIVER, provide them with the automated education postcard and instruct them to either scan the QR code or text **CMEMS** to **1-844-HEART-34** (1-844-432-7834). They will receive one message daily for 7 days.

A DEMO SITE IS AVAILABLE for clinicians to review the pathway. Scan the QR code or text **POST** to **737-204-2099**.

Remember that, in the demo environment, you will receive all the messages in 10 minutes, but patients will only receive the messages on the days outlined in the pathway.

Rx Only

Brief Summary: Prior to using these devices, please review the Instructions for Use for a complete listing of indications, contraindications, warnings, precautions, potential adverse events and directions for use.

CardioMEMS™ HF System Indications and Usage: The CardioMEMS™ HF System is indicated for wirelessly measuring and monitoring pulmonary artery (PA) pressure and heart rate in New York Heart Association (NYHA) Class III heart failure patients who have been hospitalized for heart failure in the previous year. The hemodynamic data are used by physicians for heart failure management and with the goal of reducing heart failure hospitalizations.

CardioMEMS™ HF System Contraindications: The CardioMEMS HF System is contraindicated for patients with an inability to take dual antiplatelet or anticoagulants for one month post implant.

CardioMEMS™ HF System Potential Adverse Events: Potential adverse events associated with the implantation procedure include, but are not limited to, the following: infection, arrhythmias, bleeding, hematoma, thrombus, myocardial infarction, transient ischemic attack, stroke, death, and device embolization.

myCardioMEMS™ Mobile App Limitations: Patients must use their own Apple® or Android® mobile device to receive and transmit information to the myCardioMEMS™ Mobile App. To do so the device must be powered on, app must be installed and data coverage (cellular or Wi-Fi) available. The myCardioMEMS™ App can provide notification of medication adjustments and reminders, requests for lab work and acknowledgement that the PA pressure readings have been received. However there are many internal and external factors that can hinder, delay, or prevent acquisition and delivery of the notifications and patient information as intended by the clinician. These factors include: patient environment, data services, mobile device operating system and settings, clinic environment, schedule/configuration changes, or data processing.
