

2019 Abbott Reimbursement Guide

CMS Hospital Outpatient and Ambulatory Surgical Center Reimbursement Prospectus

This document and the information contained herein is for general information purposes only and is not intended and does not constitute legal, reimbursement, coding, business or other advice. Furthermore, it is not intended to increase or maximize payment by any payer. Nothing in this document should be construed as a guarantee by Abbott regarding levels of reimbursement, payment or charge, or that reimbursement or other payment will be received. Similarly, nothing in this document should be viewed as instructions for selecting any particular code.

The ultimate responsibility for coding and obtaining payment/reimbursement remains with the customer. This includes the responsibility for accuracy and veracity of all coding and claims submitted to third-party payers. Also note that the information presented herein represents only one of many potential scenarios, based on the assumptions, variables and data presented. In addition, the customer should note that laws, regulations, coverage and coding policies are complex and updated frequently.

Therefore, the customer should check with their local carriers or intermediaries often and should consult with legal counsel or a financial, coding or reimbursement specialist for any coding, reimbursement or billing questions or related issues. It is the responsibility of the provider to verify the appropriate frequency of billing for any applicable remote monitoring codes.

The information contained in this educational piece is for reference purposes only. It is not provided or authorized for marketing use. Abbott endorses only indicated uses of its products.

The Centers for Medicare & Medicaid Services (CMS) made significant changes to calendar year 2019 (CY 2019) policies and payment levels which impact a number of procedures utilizing Abbott's technology and therapy solutions in the Hospital Outpatient Department (HOPD) and Ambulatory Surgical Center (ASC) settings of care. These changes are compounded by the advance of both new and ongoing payment reform initiatives impacting a majority of U.S. health care facilities. In this prospectus document, Abbott highlights certain payment policies and new payment rates to health care providers who perform services that are now paid differently than in prior years.

On November 2, 2018, CMS released the CY 2019 Hospital Outpatient Prospective Payment System (OPPS)/ASC Final Rule, effective for services on January 1, 2019.^{1,2}

For 2019, CMS projects a:

- 1.35% increase in total OPPS payments^{1,2}
- ASCs are expected to experience a payment increase of 2.1%.^{1,2}

We have provided the following tables based on common billing scenarios for various technologies and procedures. This is intended for illustrative purposes only and is not a guarantee of reimbursement levels or coverage. Reimbursement can vary based on the specific procedures being performed, and on the Comprehensive APCs that CMS has created in the HOPD.

Using the CY2019 rules as a reference, Abbott has analyzed the potential impact on payment to individual procedures performed within the HOPD, and in the ASC care setting, which involve our technologies or therapy solutions. We will continue to analyze the potential impact of the changes to CMS payment policies and update this document as necessary.
