

Volt™ Pulsed Field Ablation System 2026 Reimbursement Guide

This Volt™ Pulsed Field Ablation (PFA) System Reimbursement Guide is intended to provide educational material tied to the coding, coverage, and payment information related to the Volt™ PFA System when used in accordance with the product labeling.

Inpatient Coding

To report irreversible electroporation (IRE) intracardiac catheter ablations in a hospital inpatient setting, providers should use the following ICD-10-PCS code:

ICD-10-PCS	Description
02583ZF	Destruction of conduction mechanism using irreversible electroporation, percutaneous approach

Outpatient Coding

To report intracardiac catheter ablation of atrial fibrillation by pulmonary vein isolation (PVI) in the outpatient setting, providers should utilize the following CPT* code:

CPT* Code	Description
93656	Comprehensive electrophysiologic evaluation with transeptal catheterizations, insertion and repositioning of multiple electrode catheters, induction or attempted induction of an arrhythmia including left or right atrial pacing/recording, and intracardiac catheter ablation of atrial fibrillation by pulmonary vein isolation, including intracardiac electrophysiologic 3-dimensional mapping, intracardiac echocardiography with imaging supervision and interpretation, right ventricular pacing/recording, and His bundle recording, when performed

HCPCS Codes

The following HCPCS C-codes should be used to report use of the Volt™ PFA catheter, Advisor™ HD Grid X mapping Catheters, and the Agilis™ NxT Steerable Introducers:

Device	HCPCS Code	Description
Volt™ PFA Catheter, Sensor Enabled™	C1733	Catheter, electrophysiology, diagnostic/ablation, other than 3D or vector mapping, other than cool-tip
Advisor™ HD Grid X Mapping Catheter, Sensor Enabled™	C1732	Catheter, electrophysiology, diagnostic/ablation, 3D, or vector mapping
Agilis™ NxT Steerable Introducer, Dual Reach™ (13 F)	C1766	Introducer/sheath, guiding, intracardiac electrophysiological, steerable, other than peel-away

Coverage

Medicare does not have explicit local or national coverage policies for intracardiac catheter ablation procedures. Coverage is dependent on whether the procedure is deemed reasonable and necessary based on clinical documentation. Private payer policies will vary and should be verified prior to treatment for limitations on diagnosis, coding, or site of service requirements. Abbott recommends that providers refer to specific payer policies to confirm that coverage criteria are met, and, when required, request prior authorization from patients' health plans.

National Medicare Rates

All rates shown are 2026 national Medicare rates. For hospital/locality specific rates, email Abbotteconomics@abbott.com.

Hospital Outpatient (HOPD), Ambulatory Surgical Center (ASC) & Physician

CPT [†] Code	Description	Work RVU	National Medicare Rate		
			HOPD	ASC	Physician
93656	AF Ablation	16.58	\$26,704	\$20,256	\$807

Inpatient

MS-DRG	Description	National Medicare Rate
273	Percutaneous intracardiac procedures and other procedures w MCC	\$30,020
274	Percutaneous intracardiac procedures and other procedures w/o MCC	\$23,953
317	Concomitant left atrial appendage closure and cardiac ablation	\$48,656
