

## 2024 REIMBURSEMENT GUIDE

# CMS Hospital Outpatient (OPPS) and Ambulatory Surgical Center (ASC) Reimbursement Prospectus

The Centers for Medicare & Medicaid Services (CMS) made significant changes to calendar year 2024 (CY2024) policies and payment levels which impact a number of procedures utilizing Abbott's technology and therapy solutions in the Hospital Outpatient Department (HOPD) and Ambulatory Surgical Center (ASC) settings of care. These changes are compounded by the advance of both new and ongoing payment reform initiatives impacting a majority of U.S. health care facilities. In this prospectus document, Abbott highlights certain payment policies and new payment rates to health care providers who perform services that are now paid differently than in prior years.

On November 2, 2023, CMS released the CY2024 Hospital Outpatient Prospective Payment System (OPPS)/Ambulatory Surgical Center (ASC) Final Rule, effective for services on January 1, 2024.<sup>3,4</sup>

For 2024, CMS projects a:

- 3.1% increase in total OPPS payments<sup>3</sup>
- 3.1% increase in total ASC payments<sup>4</sup>

We have provided the following tables based on common billing scenarios for various technologies and procedures. This is intended for illustrative purposes only and is not a guarantee of reimbursement levels or coverage.

Reimbursement can vary based on the specific procedures being performed, and on the Comprehensive Ambulatory Payment Classification (APC) that CMS has created in the HOPD.

Using the CY2024 rules as a reference, Abbott has analyzed the potential impact on payment to individual procedures performed within the HOPD, and in the ASC care setting, which involve our technologies or therapy solutions. We will continue to analyze the potential impact of the changes to CMS payment policies and update this document as necessary.
