FELLOWS EDUCATION

CARDIOLOGY FELLOWS COURSES

The Academic Development department is committed to enhancing the training experience for fellows in the cardiovascular disease disciplines. Our premier educational programs allow the learned concepts to be applied for immediate impact on patient care, as well as incorporated into long-term healthcare strategies. We have engaged global thought leaders to create our “By Physicians, For Physicians” curriculum with a focus on our technologies. The content progresses with you from cardiology training through electrophysiology training and has both in person and online offerings. We look forward to having you join us on this educational mission.

IN-PERSON COURSES

**Cardiology Patient Pathways:
A Symptoms Based Study Approach**
28–29 October 2025
Brussels, Belgium

ECG Interpretation of Cardiac Arrhythmias

ELECTROPHYSIOLOGY FUNDAMENTALS FELLOWS CURRICULUM

The EP Fundamentals curriculum is designed to support fellows during their first year of training in electrophysiology (EP). **Commitment to attend each session of the seven month program is required.** By participating in the entire curriculum, attendees unlock the program’s full value — building essential skills, growing confidence and forming lasting connections in EP.

THE CURRICULUM INCLUDES:

- **In-person sessions:** Two hands on focused courses for the entire cohort of attendees and faculty.
- **Small group learning:** Participants are divided into small groups, guided by a faculty member.
- **Online meetings:** After each in-person session, small groups meet online to observe and discuss live cases and join fellow-led case study sessions.

This program helps fellows learn both in the classroom and through real-world application.
