

# POST-IMPLANT INSTRUCT™ PATIENT EDUCATION PATHWAY

### CARDIOMEMS™ HF SYSTEM

# **DIRECT-TO-PATIENT EDUCATION**

- · Convenient text message format
- · Simple-to-understand video messages
- Designed for patients and caregivers
- · Messages are stored to support repeat viewing

# CARDIOMEMS™ HF SYSTEM POST-IMPLANT EDUCATION PATHWAY

DAY 0	Welcome Home	٠
-------	--------------	---

DAY 0 Setting Up the CardioMEMS™ HF System in Your Home

DAY 1 Taking Your First Reading

DAY 1 First Reading Check-in and

Troubleshooting

DAY 2 Insertion Site Check Following Right Heart Catheterization

DAY 3 Partnering With Your Doctor to Manage Your Heart Failure

DAY 4 CardioMEMS HF System

ID Card and Imaging

DAY 5 Traveling With Your CardioMEMS HF System

Garaionne na Gybroni

DAY 6 Speak to a CardioMEMS HF System Patient

DAY 15 Caring for the CardioMEMS

HF System

Patient is implanted with the CardioMEMS PA Sensor

# POST-IMPLANT

enrollment instructions are provided to the patient/caregiver

Patient/caregiver enrolls, and education begins immediately

## TO ENROLL A PATIENT AND/OR CAREGIVER,

provide them with the automated education postcard and instruct them to either scan the QR code or text **CMEMS** to **1-844-HEART-34** (1-844-432-7834).

They will receive one message daily for 7 days.

A DEMO SITE IS AVAILABLE for clinicians to review the pathway. Scan the QR code or text POST to 1-737-204-2099.

Remember that, in the demo environment, you will receive all the messages in 10 minutes, but patients will only receive the messages on the days outlined in the pathway.

#### Rx Only

**Brief Summary:** Prior to using these devices, please review the Instructions for Use for a complete listing of indications, contraindications, warnings, precautions, potential adverse events and directions for use.

CardioMEMS™ HF System Indications and Usage: The CardioMEMS™ HF System is indicated for wirelessly measuring and monitoring pulmonary artery pressure and heart rate in NYHA Class II or III heart failure patients who either have been hospitalized for heart failure in the previous year and/or have elevated natriuretic peptides. The hemodynamic data are used by physicians for heart failure management with the goal of controlling pulmonary artery pressures and reducing heart failure hospitalizations.

**CardioMEMS™ HF System Contraindications:** The CardioMEMS HF System is contraindicated for patients with an inability to take dual antiplatelet or anticoagulants for one month post implant.

CardioMEMS<sup>TM</sup> HF System Potential Adverse Events: Potential adverse events associated with the implantation procedure include, but are not limited to, the following: air embolism, allergic reaction, infection, delayed wound healing, arrhythmias, bleeding, hemoptysis, hematoma, nausea, cerebrovascular accident, thrombus, cardiovascular injury, myocardial infarction, death, embolization, thermal burn, cardiac perforation, pneumothorax, thoracic duct injury and hemothorax.
