WHY PATIENTS LIKE YOU HAVE SAID "YES" TO REMOTE MONITORING WITH THE CARDIOMEMS™ HF SYSTEM

"Every morning I do my reading. The entire process of setting up, laying on it and putting it back takes maybe 5 minutes at most. Then it's on with my day. Such a simple thing that can bring me peace of mind and assurance is pretty incredible."

BOB B., DDS

Class II heart failure patient implanted with the CardioMEMS™ HF System in 2020

"To know that someone is watching and helping me by looking at my numbers while I am at home, to know where I stand, has made the biggest difference in my life. I feel like my health is in my control."

IRIS W.

Class III heart failure patient implanted with the CardioMEMS HF System in 2015

Beth's CardioMEMS HF System story

Each testimonial relays an account of an individual's response to the treatment. The patient's account is genuine, typical and documented. However, it does not provide any indication, guide, warranty or guarantee as to the response other persons may have to the treatment. Responses to the treatment discussed can and do vary and are specific to the individual patient.

Brief Summary: Prior to using these devices, please review the Instructions for Use for a complete listing of indications, contraindications, warnings, precautions, potential adverse events and directions for use.

CardioMEMS™ HF System Indications and Usage: The CardioMEMS™ HF System is indicated for wirelessly measuring and monitoring pulmonary artery pressure and heart rate in NYHA Class II or III heart failure patients who either have been hospitalized for heart failure in the previous year and/or have elevated natriuretic peptides. The hemodynamic data are used by physicians for heart failure management with the goal of controlling pulmonary artery pressures and reducing heart failure hospitalizations.

CardioMEMS™ HF System Contraindications: The CardioMEMS HF System is contraindicated for patients with an inability to take dual antiplatelet or anticoagulants for one month post implant.

CardioMEMS™ HF System Potential Adverse Events: Potential adverse events associated with the implantation procedure include, but are not limited to, the following: air embolism, allergic reaction, infection, delayed wound healing, arrhythmias, bleeding, hemoptysis, hematoma, nausea, cerebrovascular accident, thrombus, cardiovascular injury, myocardial infarction, death, embolization, thermal burn, cardiac perforation, pneumothorax, thoracic duct injury and hemothorax.
