

CENTRIMAG™ ACUTE CIRCULATORY
SUPPORT SYSTEM

EXTENDED
WARRANTY

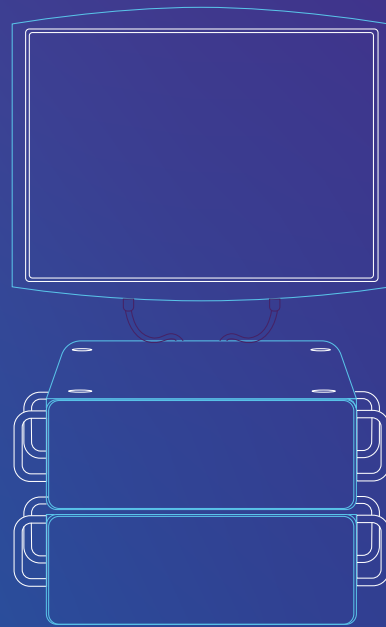

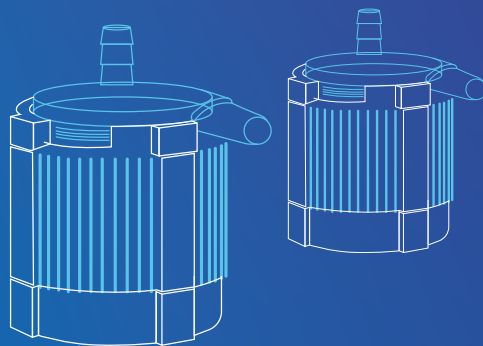

THE ABBOTT EXPERIENCE

ENSURE YOUR CENTRIMAG™ ACUTE CIRCULATORY
SUPPORT SYSTEM IS RUNNING OPTIMALLY WHEN
DOWNTIME IS NOT AN OPTION

The CentriMag™ System is an acute blood pumping system used for patients on life support. The Abbott extended warranty* enhances your experience of managing this **critical life-saving device** and maximizes your capital equipment investment throughout the life of the product.

We know our products better than anyone else,
so you can rely on our expert team to deliver
the best care for your patients.

CentriMag™ Acute Circulatory
Support System

WE TAKE CARE OF YOU SO YOU CAN CARE FOR YOUR PATIENTS

- Our Abbott-trained engineers will service equipment as requested and restore its functionality to manufacturer specifications.
- We offer incentivized pricing for full protection of the device within the first year of equipment purchase.
- We provide annual service check-up and reminders to schedule a check-up.
- We will provide priority and expedited loaner systems during the servicing period to minimize disruption to your workflow.

TO GET MORE INFORMATION
and request a custom quote, contact your
local Abbott sales representative.

THE EXTENDED WARRANTY COVERS EQUIPMENT 0-5 YEARS FROM THE DATE OF SHIPMENT AND INCLUDES:

EXTENDED WARRANTY

Parts and labor or
replacement in the event
of equipment failure

Full system check-up annually

Primary console preventative
maintenance and battery
replacement every second year

Loaner system while units
are with Abbott,
at no additional charge

Software updates performed
at no additional charge

24-hour support line
(clinical and technical)

REDUCED RISKS AND LIABILITY FOR HOSPITALS

EXTENDED WARRANTY BENEFITS:

PEACE OF MIND

- Improved customer service
- 24/7 support line through the life of the warranty
- Fast claims process
- Consistent patient care

BUDGET CONTROL

- Savings on major repair costs
- Complimentary loaner system during service
- Shipping of products and loaner systems at no additional charge
- Flexible and customized annual payment options
- Reduced out-of-pocket costs

SYSTEM SUPPORT FOR THE LIFE OF THE CONTRACT

- Access to documented service records upon request
- Scheduled preventative maintenance every 2 years with a maintenance certificate
- Loaner system available within 24 hours

A PREMIUM LIFE-SAVING DEVICE WARRANTS **BEST-IN-CLASS** **TECHNICAL SUPPORT**

SOFTWARE

Software upgrades are included as part of the service plan. They add capabilities, features or improvements to an existing software version. Software upgrades can also be purchased separately for use on systems not currently covered under the initial warranty or the service program.

HARDWARE

Hardware covers, but is not limited to, electrical, mechanical, cosmetic and structural issues with the CentriMag™ Acute Circulatory Support System components (monitor, motor including motor cable and console including battery).

PREVENTATIVE MAINTENANCE

Preventative maintenance services ensure that the CentriMag System operates at peak performance, is restored to original manufacturer design specifications and is compliant with industry safety and regulatory standards. Preventative maintenance services include:

- **A comprehensive system inspection** designed to identify and correct existing and potential causes for unplanned equipment downtime.
- **A technology calibration** that restores original manufacturer specifications and tests and confirms accuracy and signal quality.
- **Safety and functional tests** that confirm your system is safe to operate and optimized for performance.

WE'RE THERE WHENEVER YOU NEED US

SERVICE OF ABBOTT CAPITAL EQUIPMENT NOT COVERED UNDER THE EXTENDED WARRANTY

If your Abbott capital equipment is not covered under the extended warranty and is experiencing technical problems that require replacement components and/or service, you can access our Time and Materials Service. This service is a time and materials program and can be ordered through your Abbott sales representative.

Time and materials will be charged at Abbott's prevailing rate.

Important Safety Information

Brief Summary: Prior to using these devices, please review the Instructions for Use for a complete listing of indications, contraindications, warnings, precautions, potential adverse events and directions for use.

CentriMag™ Circulatory Support System Indications [PMA Approval; 30-day use]: Temporary circulatory support for up to 30 days for one or both sides of the heart to treat post-cardiotomy patients who fail to wean from cardiopulmonary bypass, providing a bridge to decision when it is unclear whether the patient's heart will recover or whether the patient will need alternative, longer-term therapy.

CentriMag Circulatory Support System Contraindications [PMA Approval; 30-day use]: The CentriMag Circulatory Support System is contraindicated for use as a cardiomy suction device. The system is also contraindicated for patients who are unable or unwilling to be treated with an appropriate anticoagulant such as Heparin or a comparable alternative.

CentriMag™ Circulatory Support System Adverse Events [PMA Approval; 30-day use]: Adverse events that may be associated with mechanical circulatory support can include, but are not limited to, the following: bleeding on device support, hemolysis, infection, renal failure/ dysfunction/ complication, respiratory dysfunction, hepatic dysfunction, cardiac arrhythmias (atrial or ventricular), thromboembolism (venous and arterial non-CNS), hypotension, hypertension, device malfunction or failure, psychiatric events, right heart failure, and death.

Humanitarian Device Statement: Caution: Humanitarian Device. The CentriMag Circulatory Support System is authorized by Federal Law for temporary circulatory support for up to 30 days for patients in cardiogenic shock due to right ventricular failure. The effectiveness of this device for this use has not been demonstrated.

CentriMag™ RVAS Indications [Humanitarian Exemption Device (HDE) Approval; 30-day use]: The CentriMag Circulatory Support System is intended to provide temporary circulatory support for up to 30 days for patients in cardiogenic shock due to acute right ventricular failure.

CentriMag RVAS Contraindications [Humanitarian Exemption Device (HDE) Approval; 30-day use]: The CentriMag Circulatory Support System is contraindicated for use as a cardiomy suction device. The system is also contraindicated for patients who are unable or unwilling to be treated with an appropriate anticoagulant such as Heparin or a comparable alternative.

CentriMag™ Acute Circulatory Support System Temporary Expanded Indication: The FDA issued an enforcement policy guidance document in April 2020 allowing for FDA-cleared or approved cardiopulmonary bypass devices to be used in an ECMO circuit to treat patients who are experiencing acute respiratory failure and/or acute cardiopulmonary failure during the COVID-19 public health emergency. The CentriMag™ System including the CentriMag™ Blood Pump and PediMag™ Blood Pump are indicated for use as part of an ECMO circuit for longer than 6 hours to treat patients with acute respiratory failure and/or acute cardiopulmonary failure.

CentriMag™ Blood Pump Indications [510(k) Clearance; 6-hour use]: The CentriMag Circulatory Support System is indicated to pump blood through the extracorporeal bypass circuit for extracorporeal circulatory support for periods appropriate to cardiopulmonary bypass (up to six hours). It is also indicated for use in extracorporeal support systems (for periods up to six hours) not requiring complete cardiopulmonary bypass (e.g. valvuloplasty, circulatory support during mitral valve reoperation, surgery of the vena cava or aorta, liver transplants etc.).

CentriMag Blood Pump Contraindications [510(k) Clearance; 6-hour use]: The CentriMag Circulatory Support System is contraindicated for use as a cardiomy suction device. The system is also contraindicated for patients who are unable or unwilling to be treated with an appropriate anticoagulant such as Heparin or a comparable alternative.

PediMag™ Blood Pump Indications for Use [510(k) Clearance; 6-hour use]: The PediMag Blood Pump is indicated for use with the CentriMag Circulatory Support System console and motor to pump blood through the extracorporeal bypass circuit for extracorporeal circulatory support for periods appropriate to cardiopulmonary bypass (up to six hours) for surgical procedures such as mitral valve reoperation. It is also indicated for use in extracorporeal support systems (for periods up to six hours) not requiring complete cardiopulmonary bypass (e.g. valvuloplasty, circulatory support during mitral valve reoperation, surgery of the vena cava or aorta, liver transplants etc.).

PediMag Blood Pump Contraindications [510(k) Clearance; 6-hour use]: The PediMag Blood Pump is contraindicated for use as a cardiomy suction device. The CentriMag Circulatory Support System is contraindicated for use as a cardiomy suction device. The system is also contraindicated for patients who are unable or unwilling to be treated with an appropriate anticoagulant such as Heparin or a comparable alternative.
