- HAVE READ, UNDERSTAND, AND AGREE THAT YOU ARE BOUND BY THE TERMS AND CONDITIONS IN THIS AGREEMENT;

- WARRANT THAT YOU ARE OF LEGAL AGE TO ENTER INTO THIS AGREEMENT;

PLEASE READ THE LIABILITY EXCLUSIONS AND LIMITATIONS IN SECTION 12 AND DISCLAIMERS IN SECTIONS 8, 10(a), AND 11. THESE SECTIONS LIMIT YOUR REMEDIES AND OUR LIABILITY.

Additional terms applicable to Resources or Services made available within the App may also apply ("**Additional Terms**"), and the Additional Terms are incorporated by reference into this Agreement. 1. Key Definitions of this Agreement

The following key terms have the meaning below in this Agreement:

App. The CardioGuide™ mobile application for the CardioMEMS™ HF System that allows patients to receive custom messages and treatment instructions from their healthcare provider, receive daily medication and reading reminders, and other information, and see CardioMEMS™ HF System readings (the "**Services**").

CardioMEMS™ HF System. The CardioMEMS Heart Failure (HF) System is indicated for wirelessly measuring and monitoring pulmonary artery pressure and heart rate in NYHA Class II or III heart failure patients who either have been hospitalized for heart failure in the previous year and/or have elevated natriuretic peptides. The hemodynamic data are used by physicians for heart failure management with the goal of controlling pulmonary artery (PA) pressures and reducing heart failure hospitalizations.

Data. Your personal data, including health data, and any other data about You stored in the App, including information You enter into the App, certain information displayed or transmitted through the App and Services from healthcare providers, and certain information concerning Your Mobile Device.

Mobile Device. A smartphone (such as, for example, an Apple iPhone or Samsung Galaxy) used to install and use the App.

2. Background of the App

Abbott is the manufacturer of Your CardioMEMS™ HF System. Abbott has developed the App and holds the relevant authorizations and/or registrations for it where required by applicable

laws. The App may not be compatible with all Mobile Devices or all versions of Mobile Devices or their operating systems. You are responsible for obtaining, maintaining, and paying for all hardware and all telecommunications and other supplies or services not provided by Abbott that are needed to receive, access, or use the App and Services and to transmit data with the Merlin.net™ PCN (defined below). You (or the Mobile Device owner) may be charged by Your and their service providers for Internet access or data usage on the Mobile Device. You accept responsibility for the use of, and for paying all charges, fees, or taxes related to the use of, the App and Services or in relation to any Mobile Device, whether or not it is owned by You.

After patient users have registered to use the App, they will be prompted to allow App notifications to their Mobile Device. If enabled, (1) the healthcare provider will be able to send Mobile Device notifications for messages and medication changes directly to the App through the Merlin.net™ Patient Care Network ("**Merlin.net™ PCN**") and (2) Abbott will be able to send operational and service messages for the App and the CardioMEMS™ HF System. A patient's healthcare provider can use Merlin.net™ PCN to review and manually communicate specific guidance based on the patient's pulmonary artery (PA) pressure readings from the CardioMEMS™ HF System and provide treatment instructions to the patient through the App or other method. A healthcare provider may also direct automatic treatment instructions to be sent to the App based on patient PA pressure readings in certain circumstances. The App also enables patients to see the transmission status of CardioMEMS™ HF System readings, view daily medication and receive CardioMEMS™ HF System reading reminders, and view the monthly history of transmissions and messages from the healthcare provider. When patients acknowledge receipt of messages and medication change notifications, the 'acknowledgement' data is sent to Merlin.net™ PCN so the healthcare provider can see that information.

Your Mobile Device and the App may provide features that permit you to authorize and connect the App with other health-related applications installed on the Mobile Device, such as Apple Health. When connected, You may have the option to share data between such applications and the App. Abbott is not responsible or liable for how the non-Abbott operators of other applications use and protect the Data You choose to share with them. You share Data from the App to those other applications at your sole risk.

3. Accounts

a. Registration

To register, You will need to enter some of Your personal data into the App, including Your date of birth and CardioMEMS™ HF System PA sensor serial number via the App screen along with Your email address and telephone number ("**Registration Information**"). There can only be one person registered as the patient for each CardioMEMS™ HF System PA sensor serial number.

You agree to provide and maintain accurate, current, and complete information when You register with the App. You acknowledge and agree that the App and Services are designed and intended for personal use on an individual basis and that You will keep Your account information private. However, Abbott is also a controller of certain Data, including health-related data, for specified and limited processing purposes as described below and in the App Privacy Notice. For additional information on how Your Data with be managed, please reference the App Privacy Notice.

By using the App, You acknowledge and agree that Internet transmissions, including transmissions of Data, are never completely private or secure. You understand that Internet transmissions may be read or intercepted by others, even if there is a special notice that a particular transmission is encrypted.

Abbott is not responsible for unauthorized access to, use of or alteration of Your Data. If You email, back up, take a screenshot of Your information on the App or otherwise share any of Your Data or reports with third parties, that information may not be encrypted and Abbott will have no ability to manage the privacy or security of that information. You should take the steps that You determine are appropriate to protect the security of such information.

c. De-registering or Removing the App from a Mobile Device

In the event it is determined You no longer require access to the App, You must immediately discontinue use of the App, Documentation, Services, and Resources and uninstall the App.

You may delete, that is uninstall, the App from a Mobile Device at any time. Uninstalling the App from a Mobile Device will not impact the data transmitted to Merlin.net™ PCN from a CardioMEMS™ HF System or stored in Merlin.net™ PCN by Your healthcare provider. Therefore, Your healthcare provider will continue to see data related to the CardioMEMS™ HF System You are using. However, Your healthcare provider will no longer be able to receive information from You via the App and Services and You will no longer receive information from the healthcare provider through the App or Services. You are solely responsible for retaining, maintaining, storing and backing up (electronically and/or with hard copies) any information that You wish to preserve before You delete or uninstall the App from a Mobile Device. Abbott has no responsibility for retaining, storing or backing up the information on the App. You are solely responsible for coordinating with your healthcare provider about your heart condition and care, including when you are no longer using the App and have deregistered or deleted the App. Abbott has no responsibility in notifying your healthcare provider if you stop using the App.

You may be able to terminate Your account or delete Your Data by using the functions available through the App, if available, and deleting the App from the Mobile Device. If this function is not available on the App for You, please contact Technical Services at +1-844-692-6367.

Any Data that You have previously downloaded to Your Mobile Device or have sent to a third party will not be deleted if You delete or uninstall the App or delete it through the App. Please be aware that if You delete Your Data in the App, Abbott will retain previously created aggregated, anonymized, or de-identified information and may need to retain certain Data as required by law. For additional information on how Your Data will be managed, please reference the App Privacy Notice.
