CARDIOGUIDE™ HF APP

SENSITIVE PERSONAL DATA CONSENT

By clicking “Accept”, I consent to the processing of information related to my health (collectively, “Sensitive Data”) by Abbott Laboratories ("Abbott") (and its contracted service providers) to provide me with the CardioGuide™ HF App functionality and service. I may provide Sensitive Data manually or indirectly (such as through a mobile health data platform).

Additionally, I understand the App has the ability to automatically upload certain data stored in log files from the App to Abbott and Abbott’s service providers. This data will be used by Abbott and its service providers to provide you with troubleshooting and product support. I agree that Abbott and its service providers may store the following types of personal information and technical data, some of which may be considered Sensitive Data under applicable law:

- My CardioMEMS™ HF System serial number;
- Information on how I interact with the App;
- Information relating to the functioning of my CardioMEMS™ HF System; and
- Information relating to the functioning of the App, including crash information for troubleshooting purposes.

For more information about how Abbott uses personal information please review the **App Privacy Notice** and our **Consumer Health Data Privacy Policy.**

I understand I can withdraw my consent at any time by using the options made available to me through the App. If I choose to withdraw my consent, Abbott will discontinue processing Sensitive Data for the purposes described above where required by applicable law, and I may not be able to use certain features of the App, such as viewing CardioMEMS™ HF System readings.

Residents of certain states may withdraw their consent to certain collection and processing by contacting Abbott as set out in the “+Contact Us” section of the **App Privacy Notice**. This does not apply where Abbott collects and processes your information based on your health care provider’s instructions. If you have questions about how your health care provider uses your information, you should contact your health care provider directly.
